

# POST NO. 2

If you have looked around old cemeteries or old houses that have stood many years you have undoubtedly seen this post. This is a standard with many old fences. This post may be purchased with or without the shown inserts. We recommend placing this post at the corners of your fence and on each side of your gates. This turn of the century post is smaller than Post No. 1, yet remains very substantial. The crown and ornate inserts are cast iron, the uprights are made of 5/8 inch solid square bar. This is a beautiful cast crown post. It is available to match all heights of our fencing. We have available the original fence mounting brackets for this post.
